

Look for the ABCDEs OF MELANOMA

and if you see one or more, schedule an appointment with us today

BENIGN

MALIGNANT

Symmetrical

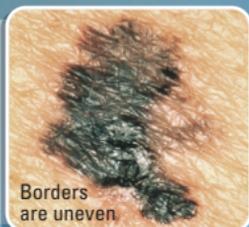

Asymmetrical

ASYMMETRY

If you draw a line through this mole, the two halves will not match.

Borders are even

Borders are uneven

BORDER

The borders of an early melanoma tend to be uneven. The edges may be scalloped or notched.

One Color

Multiple Colors

COLOR

A variety of colors is another warning signal. Different shades of brown, tan, or black can appear. A melanoma may also become red, blue, or some other color.

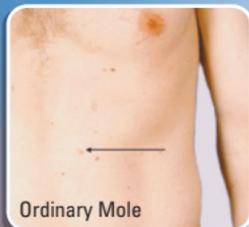

Smaller than 1/4 inch

Larger than 1/4 inch

DIAMETER

Melanomas usually are larger in diameter than the size of the eraser on your pencil (1/4 inch or 6 mm), but they may sometimes be smaller when first detected.

Ordinary Mole

Changing Size, shape and color

EVOLVING

Any change — in size, shape, color, elevation, or another trait, or any new symptom such as bleeding, itching or crusting — points to danger.

Every 8 minutes, someone in the U.S. will be diagnosed with melanoma.
